SITE PLAN AMENDMENTS

NO.	DATE	REVISION
1	DEC/03	CHANGE OF OWNERSHIP OF LANDS WITHIN 120 METRES OF NORTH BOUNDARY.

- GENERAL NOTES:**
- The site and surrounding area is a sand and gravel deposit. Reference OGS Quaternary Geology Map of Windsor Essex County Area (Eastern Part) Map. P. 750.
 - The site and surrounding area is also identified as a primary significant deposit, on Map #2, of the Aggregate Resources Inventory paper #125 - 1989; prepared by the Ontario Geological Survey.
 - The approximate Geographic Co-ordinates of the centre of the site are latitude 42 degrees 03 minutes 21 seconds, longitude 82 degrees 39 minutes 07 seconds.
 - The property boundaries are taken from Reference Plan 12R-19785 prepared by Clarke Surveyors Incorporated dated Aug 22/02.
 - The Municipality of Leamington Official Plan, shows the site zoned as M-2 Extractive Industrial which allows aggregate operations.
 - Elevations are according to Canadian Geodetic Datum, based on Monument #01086069 - Elevation 212.657, and a local bench mark on site - Elevation 214.22.
 - The total area to be licenced is 13.88 ± ha. The area to be extracted is 11.50 ± ha.
 - Topographic information is compiled from field assessment by Clarke Surveyors Incorporated in June/July, 2002 and County of Essex Air Photography photos # 3640-4650, 3640-4660 and 3650-4660 taken in 2000.
 - Property owner information taken from assessment records from the Municipality of Leamington.
 - Drainage on the site and the surrounding lands is by natural percolation through the aggregate. Natural subsurface drainage is generally from west to east. Water well information was taken from Ministry of the Environment Water Well records, monitoring wells and test holes on site, ponds on and adjacent to the site; and field survey by Clarke Surveyors Incorporated June-Aug/02.
 - There is a municipal water main along County Road No 18 and County Road No 31. All dwellings and the adjoining agricultural greenhouse operations use private pipelines to the Municipal water main, with some individual wells and ponds used as a backup for irrigation or other uses.
 - The elevation of the established water table varies between 209.5 ± and 206.0 ± metres across the property.
